

FILE ATTACHMENTS

About file attachments

File attachments may be added to different places in a course, for example, to an Item, an Assignment, or a File in a Learning Unit. There are two options for adding file attachments:

- **Files on local network:** Select **Browse** next to **Browse Local Files** to navigate to a file on the network.
- **Files in the Blackboard Content System:** Select **Browse** next to **Link to Content Collection item** to navigate to a file in the *Blackboard Content System*.

Users will open the file by clicking a link to the file that appears in the course. After selecting a file to attach, users may enter a name for the link to the file. This name will appear to users, instead of the name of the document. For example, users would see "Biology Syllabus" instead of syllabus_bio_101.doc.

Accepted characters in file names

Blackboard allows the use of all characters in file names. However, the user's operating system and browser may limit the types characters accepted. For example, some browsers do not accept multi byte characters.

Recognized content attachments

The following file types are recognized by the Blackboard Learning System. These files can be displayed within a content item.

NOTE: The Blackboard Learning System can recognize additional file types and associated applications if a MIME extension is added. Contact your System Administrator for more information about adding MIME extensions.
