Text: *Calculus, Early Transcendentals* by Briggs and Cochran, chapters 1-5, 6.1, 6.2

Instructor: Dr. Marc Renault

Office: MCT 287

Phone: 477-1234

Email: mrenault@ship.edu

Web: webspaces.ship.edu/mrenault

Grading Areas:

1. **Homework and Quizzes** – 20%. Problems will be online and assigned through *MyMathLab*. Homework is 10% and quizzes are 10%. Even though these homework problems are on the computer, use a pencil, calculator, and scratch paper to work out your answers. Other in-class or out-of-class projects may be assigned that count toward your homework grade.
   - Go to [http://pearsonmylabandmastering.com/](http://pearsonmylabandmastering.com/) and click the button for students.
   - Enter the course ID: renault76497 and click continue.
   - Enter your eBook access code, or buy one with a credit card ($80.00)

2. **Tests** – 50%. Three tests: Sept 28, Oct 26, Nov 21. Your lowest test grade will be dropped and the other two tests will each count 25% toward your class grade. Missed tests will receive a grade of 0, no exceptions.

3. **Final Exam** – 30%. A comprehensive final exam will be given during final exam week. Date and time will appear on your Student Information System when they become available.

Extra Credit: Each activity will add 1 point to a test grade. Maximum 10 extra credit points.
- Attend a department “Thursday Seminar” and submit a good write-up (1 page max).
- Submit a good solution to the “Problem of the Week” before it’s due, and give me a copy of your solution.
- Write up a “Math in the Media” report. Details are on my web site. Maximum 1 per week.

Your Course Grade: Each of the three areas above is graded out of 100 points. Let $H =$ your homework grade, let $T^*$ = average of your two best test scores, and let $F =$ your final exam grade. Your grade for the course is calculated as $0.2H + 0.5T^* + 0.3F$.

Graphing calculators are required. In particular, I recommend the TI-83 or TI-84 family of calculators. Calculators may be used during tests unless indicated otherwise. **However**, calculators capable of symbolic differentiation/integration are not allowed on tests. **Specifically, the TI-89 and Voyage 200 may not be used on tests.**

Using cell phones during class is extremely rude. I die a little inside each time I see you text in class.

Accommodations for Learning Disabled Students. Students who have registered with the Office of Disability and desire instructional accommodations should notify me.

Is it reasonable to expect to spend 14 hours per week on homework for this class? Yes  No
How many homework hours per week is reasonable to expect for this class? _____
